

Online presentation

Supporting Primary and Secondary EAL/D learners through digital and literature resources

Wednesday August 21

5 – 6 pm

Creating a meaningful context for EAL/D Learners is essential for learning language and to increase student understanding of curriculum content. This online professional development session presents digital resources that engage and support EAL/D learners across both the primary and secondary curriculum. The session also touches on some contemporary literature resources that you and your EAL/D learners will love.

Bernadette Barker, an independent consultant in EAL/D and **Susanna Di Mauro**, Senior ICT Engagement Officer, Brisbane Catholic Education have worked together for many years in teacher support and education. Our recent project, reported in Volume 31 of *TESOL in Context* in 2023, *Connecting families with multilingual digital texts*, shows how important it is to combine digital technologies and resources with a multilingual and culturally aware approach to learning.
